

ITX POS+

ITX POS+ is an advanced, RFID-enabled cashless point of sale solution. Guests have the option to use their cards or mobile wallets, tapping their RFID wristband to initiate the transaction. This allows for broader on-site payment flexibility--with a significant data boost.

- **RFID Integration:** Combine traditional cashless payments with RFID for an efficient, secure and contactless guest experience.
- **Real-time Data Collection:** Track guest behavior, spending habits and engagement in real-time, empowering you to adjust on the fly.
- **Personalized Interactions:** Personalize access and incentives, giving guests a tailored experience, adding value to sponsors.
- **Enhanced Security:** Keep transactions safe by reducing the risk for fraud and eliminating the risks of cash handling on-site.
- **Reliable Payments:** Manage guest transactions, payment options, processing and settlements seamlessly with ITX POS.

BOOST REVENUE

Reduce wait times and drive purchases with speed and convenience.

FLEXIBLE PAYMENTS

Continue to run traditional cashless options with the added benefit of identifying guests with RFID wristbands.

DATA-DRIVEN

Pull real-time data to optimize your event on the fly, and to make truly informed future decisions.

INTEGRATED

Unlock your event's true potential with Intellitix's ticketing integration with 25+ partners globally.
